

Saskatchewan Invasive Species Council

Memorandum of Support

Invasive species are a pressing economic and environmental threat. These biological invaders can dominate and destroy ecosystems and produce severe, widespread, often irreversible impacts in many areas, including: industry (agriculture, ranching and fisheries etc.), recreation, natural resources, biodiversity, habitat, ecosystem functioning, human health, etc. Invasive species often have cascading effects, which have the ability to affect entire systems.

The Saskatchewan Invasive Species Council's mission is to enable collaboration and facilitate partnerships in order to initiate and improve actions against invasive alien species in Saskatchewan and those that threaten our borders. It provides leadership, knowledge and expertise as well as a forum to engage, enable and empower citizens to take action on invasive species issues.

Signatories to this Memorandum of Support recognize invasive species are a threat to Saskatchewan. Signatories also endorse The Saskatchewan Invasive Species Council's vision of working together to ensure protection of Saskatchewan's environment, economy and social interests through permanent control and eradication of invasive alien species.

Signing this Memorandum of Support does not oblige signatories to contribute anything, financially or otherwise, to the Saskatchewan Invasive Species Council and is not binding in any way.
